

I have read ^{HB-}6904, APPOINTMENT OF
REGISTRARS OF VOTERS

The State, its' candidate, and the voters
have been well served by our
current system of dual election
administration and instead action
should be taken to correct the areas
where the system failed.

Rather than abandon a unique system that
has served our state well, the legislature
should assist the local municipality that has
had problems to try to correct a problem
that was is really a local problem.

In adopting this version of a non-partisan
election management Legislators must
remember the partisan application of 'election
reform' that happened in other states, such as
Ohio, Texas, Georgia, and Texas where one
party's political agenda became distrust by the
electorate on their systems.
